

Whatever the weather,
the outdoors is still yours.

Atika

Tensioned pergola

umara[®] by Llaza

More shade when you need it.

More freedom to choose.

More comfort with no effort.

More moments that last longer.

Create more moments to enjoy life outdoors, without limits.

The retractable roof transforms your space in seconds.

Open the roof and let natural light flood every corner. Close it whenever you need and enjoy shade, comfort and protection from wind and rain.

Atika is more than just a roof: it is the freedom to enjoy outdoor living your own way.

Atika creates an outdoor living space, perfectly balanced between functionality and atmosphere throughout the day. Integrated LED lighting within the roof itself creates a warm and welcoming ambience once night falls.

Harmony lies in the details.
Its clean lines and the seamless
integration of technical elements create
an elegant and balanced aesthetic.

Nothing should stand between you and
your moments..
Atika adapts to the surroundings so every
gathering feels exactly as you imagined it,
without compromise.

When the rain arrives, everything flows
naturally.
Its drainage system channels water away
cleanly and silently.

Designed to fit naturally into your space.
Atika integrates effortlessly into any project.

Its modular system allows large continuous areas to be created, whether wall-mounted or freestanding, adapting to different layouts with complete versatility.

Outdoor living becomes effortless when everything works in harmony. Solar protection, thermal comfort and a constant feeling of wellbeing from morning through to night, all year round.

Clean design, a robust structure and details that make the difference. Atika combines visual lightness with exceptional strength, blending naturally into any setting while balancing aesthetics and functionality.

With a single movement, the roof opens to the sky or closes to provide shade and protection. Everything happens smoothly and silently, so all you need to think about is enjoying the moment.

When night falls, everything takes on a new light. The LED lighting creates a warm and immersive atmosphere that invites you to extend every moment, every conversation and every shared experience.

A space that opens up new possibilities.

When closed, a new experience begins..
Atika becomes a refuge where comfort and
protection allow you to keep enjoying
every moment without limits.

Glass curtains and vertical blinds integrate
naturally into the structure, creating
an intimate, bright and welcoming
environment designed for sharing,
lingering and living every moment
at your own pace.

Atika

Tensioned pergola with a retractable roof for terraces, gardens, and hospitality spaces, combining solar protection, design, and comfort to create enjoyable outdoor environments all year round. Its high-strength aluminum structure and tensioned fabric provide protected spaces with a clean, elegant appearance and excellent resistance to weather conditions.

Atika comes standard with motorized operation and can optionally be equipped with integrated LED lighting in the roof, as well as side enclosures that enhance comfort and expand the possibilities of the space. Its modular design and ability to adapt to both small spaces and large-scale projects make it a solution that perfectly balances aesthetics, functionality, and versatility.
