

Spaces designed
to make you want
to stay.

Elit-110

Retractable Flat Awning

umara[®] by Llaza

More space to share.

The freedom to choose, whenever you want.

New ways to enjoy outdoor living.

Moments that effortlessly stretch on.

Moments that invite you to stay a little longer.

Transform any outdoor space into a place where
everything feels perfectly in place.

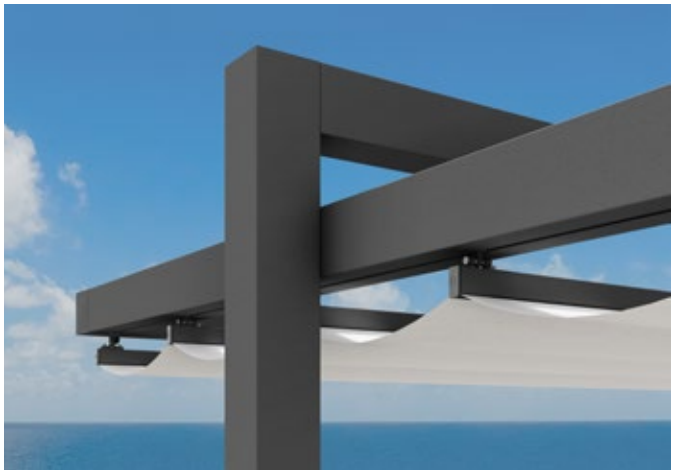

Light, calm and beautifully balanced forms that enhance every moment. It's not simply about creating an outdoor space. It's about the way you experience it.

A design that blends effortlessly into its surroundings, allowing nothing to distract from what truly matters. Because when a space is designed around wellbeing, time takes on its own rhythm and seems to move differently.

Elit-110 transforms outdoor living into a place where everything finds its perfect balance.

Open whenever you want to feel
connected to the sky.
Sheltered whenever comfort is your
priority.
No limits. No compromises.
Simply a space to enjoy.

Every detail has been carefully
designed to integrate naturally with
your space.

Clean, seamless joints.
Discreet design solutions.
Support feet that adapt effortlessly to
the terrain.

Every element works together in
harmony to achieve a perfectly
balanced installation, where everything
is exactly where it belongs.

A system designed to adapt to everything you imagine. Its versatile design makes it possible to create unique outdoor spaces, seamlessly integrated into the architecture or fully open to their surroundings.

Wall-mounted or freestanding.
Spacious or intimate.

Every configuration is designed around a different way of enjoying outdoor living.

Because every outdoor space deserves to be experienced in its own unique way.

The retractable roof glides effortlessly, letting sunlight in or providing shade whenever you need it.

Like a series of waves suspended in mid-air, the fabric extends and retracts with graceful fluidity, filtering the light and creating the perfect atmosphere for every occasion.

And when the weather changes, you're always in control. Because enjoying outdoor living should never depend on the weather.

As evening falls, the atmosphere begins to transform. Light flows through the structure, enhancing every moment.

Across the roof.
Along the columns.
Along every line that shapes the space.

Integrated lighting gently surrounds the space, creating a warm, elegant and welcoming atmosphere. It adds a whole new dimension to outdoor living, allowing every moment to last just a little longer.

Elit-110

Retractable flat pergola with an aluminium structure, designed to provide effective sun protection while creating comfortable outdoor living spaces for terraces, gardens and hospitality environments.

Its retractable roof opens and closes smoothly to suit every moment. Thanks to its modular design, the system adapts to a wide range of installation layouts and can be equipped with integrated LED lighting and vertical screens to enhance comfort and extend the usability of the space throughout the year.
