

Step back into your
comfort zone.

Elya

Bioclimatic pergola

umara[®] by Llaza

Savor every moment.

Get close to nature.

Craft memories that stand the test of time.

Discover peace or share the joy.

Share unforgettable moments.

Technology designed for your well-being.

ELYA is far more than a pergola: it's the place where the outdoors comes alive. A retreat designed to set worries aside and let you enjoy the passing of time with the confidence that advanced technology quietly provides. Its mechanisms move with effortless precision, while the strength of its structure ensures a feeling of safety—so you can focus on what truly matters: living.

Light and shade, exactly the way you want. The adjustable slatted roof adapts perfectly to your preferences. Whether with the remote control, your smartphone, or even voice commands, you decide its position within a range of 0 to 135°.

Control how much light you let in and where you want the air to flow, creating the perfect comfort temperature for you at every moment.

Tailored to you. Wherever and however you want, ELYA adapts to your needs. Its versatility allows it to blend seamlessly into any setting—attached to a wall or as a free-standing structure.

No matter if your floor is uneven, sloped, or not perfectly level, ELYA adjusts to your space while always maintaining flawless functionality.

Always ready. The ELYA bioclimatic pergola adapts to your needs, regulating the temperature according to the season and brightening new spaces with its multiple lighting options—LED strips, spotlights on the slats, and perimeter LED lighting.

The insulated slat option enhances comfort in every way: it helps maintain a pleasant temperature, reduces the sound of rain, and prevents condensation caused by temperature differences. It lets you enjoy your space in every season.

Experiencing the outdoors has never been easier.

Always within reach, the ELYA bioclimatic pergola is your ultimate ally in enhancing well-being. It helps maintain thermal comfort throughout all four seasons and extends light exactly where you want it.

Customize the atmosphere with its lighting options: perimeter—ambient and/or direct—and also integrated into the louvers, with LED strips or round spotlights.

Adjust the intensity, create the perfect mood, and let this space transform into your true comfort zone.

Elya

Bioclimatic pergola for terraces, gardens, and hospitality spaces that combines solar protection, natural ventilation, and contemporary design. Its adjustable louvers regulate sunlight and airflow to create a comfortable environment at any time of the day. Elegance, functionality, and comfort for enjoying the outdoors all year round.

It can be equipped with LED lighting, perimeter enclosures, and a wide range of customization options to suit the requirements of each project.
