

Spaces that emerge from
something extraordinary.

Majestic Lux

Retractable bioclimatic
pergola

umara[®] by Llaza

More life under the open sky

More freedom to choose.

More ways to enjoy life.

A life more open to the outdoors.

Because some terraces deserve something more,
and there are people who know how to appreciate it.

Majestic Lux is not just a
bioclimatic pergola.

It is the freedom to choose. To adapt
the space to every moment. And to
access possibilities that go beyond
the ordinary.

Because when the outdoors
opens up to new possibilities, the
experience changes completely.

The roof adapts to the needs of the moment, allowing you to personalise the experience in a simple and natural way.

A balance between protection, design and flexibility that expands the possibilities of enjoying outdoor spaces throughout the year.

More options.
More comfort.
More ways to experience the space.

There are places where conventional solutions reach their limits. Majestic Lux knows how to go one step further.

Its ability to open up expands possibilities, reaching places where other solutions fall short.

True elegance never needs to draw attention to itself. That is why Majestic Lux's integrated lighting complements the architecture discreetly, creating a serene and sophisticated atmosphere.

Perimeter lighting that surrounds the space without imposing itself, enhancing the atmosphere with its natural elegance.

Because some places allow us to let go and rediscover a sense of calm.

Majestic Lux

Bioclimatic pergola with a retractable roof for terraces, gardens and hospitality spaces, combining sun protection, natural ventilation and maximum openness to the outdoors. Its roof adjusts according to weather conditions, allowing you to enjoy sunlight, shade or an open sky at any moment.

It combines contemporary design, comfort and technology to create versatile outdoor spaces throughout the year. Available with perimeter LED lighting, glass side enclosures and additional solutions to adapt to the requirements of each project.
