

The tensioned retractable cover that balances light, shade and comfort.

Verastor Sky

Veranda awning

umara[®] by Llaza

Outdoor spaces can adapt to every moment.

More shade when the sun is at its strongest.

More openness to let natural light in.

You decide how you want to enjoy it.

Create spaces that adapt to your needs at every moment.

Its tensioned retractable cover is designed for patios and terraces, either as a standalone solution or integrated above skylights and glass pergolas.

It regulates sunlight, softens natural light and expands the possibilities for using the space, allowing you to enjoy greater comfort throughout the day.

Verastor-Sky brings a new dimension to outdoor comfort.

Designed to cover large areas with a single fabric panel, it creates protected spaces with a continuous fabric surface that remains perfectly tensioned at all times. Space, visual lightness and the quality of the environment become the true protagonists.

Whether installed above a glass roof or used to create a new protected outdoor area, Verastor-Sky integrates discreetly into the space, providing comfort without disturbing the overall balance.

Its tensioned retractable cover adapts to every moment of the day, regulating sunlight and creating more comfortable environments to fully enjoy outdoor living.

The fabric remains firm and perfectly tensioned, without creases or distortions. The result is a clean and harmonious finish that conveys a sense of order, quality and wellbeing.

When retracted, it is housed inside its upper cassette, protected from dirt and unnecessary exposure to the elements.

Greater balance.

Greater comfort.

Greater peace of mind every day.

Its tensioned retractable cover adapts to patios and terraces, either as a standalone solution or integrated above skylights and glass pergolas.

It regulates sunlight, softens natural light and expands the possibilities for using the space, allowing you to enjoy it with greater comfort.

A solution that combines design and technology to integrate seamlessly into architecture, providing comfort and protection without compromising visual lightness.

It integrates subtly into the space, fitting naturally without imposing itself or taking up more room than necessary. When the fabric is retracted, the view opens up and the sky once again becomes the main focus.

Verastor-Sky integrates into what already works, making it even more comfortable: there when needed and discreet when it is not.

Because true integration is not about standing out, but about enhancing the space while respecting its essence.

Verastor-Sky

Tensioned retractable veranda awning for glass roofs, patios and terraces. It can be installed between walls or with its own supporting structure to create new protected areas.

It combines solar protection, design and comfort. Its fabric always remains perfectly tensioned, providing a clean and uniform surface. When retracted, the fabric is housed inside its cassette, protected from the elements and maintaining its appearance over time.

Optional LED lighting extends the enjoyment of the space well into the evening.

Made in Europe

Manufactured, machined and assembled in Spain.

Powder coating

Powder coating with an environmentally responsible coating process.

MATERIALS

High-strength aluminium

Metal structure manufactured from steel and high-strength aluminium.

Acrylic and technical fabric

Roof fabric available in acrylic fabric or technical outdoor fabric.

INSTALLATION VERSATILITY

WALL-MOUNTED

ON STRUCTURE

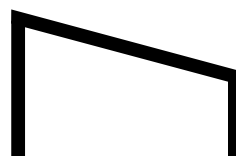

BETWEEN WALLS

OPERATION

Available with motorised operation and various automation options.

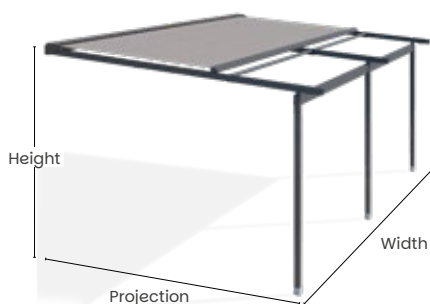

SLOPE

0° – 35°

Wide inclination range for all installation configurations.

MAXIMUM DIMENSIONS

*Maximum projection with reinforced guide.
Without reinforced guide: 5.00 m

Width	Projection	Guides	
5,00	6,00*	2	At the ends
6,00	6,00*	2	Sliding inwards 0,5 m
7,00	6,00*	3	At the ends
10,00	6,00*	4	At the ends
12,50	6,00*	5	At the ends
14,00	6,00*	6	At the ends
5,00	7,00	2	At the ends
6,00	6,00	2	Sliding inwards 0,5 m
7,00	7,00	3	At the ends
10,00	7,00	4	At the ends
12,50	7,00	5	At the ends
14,00	7,00	6	At the ends

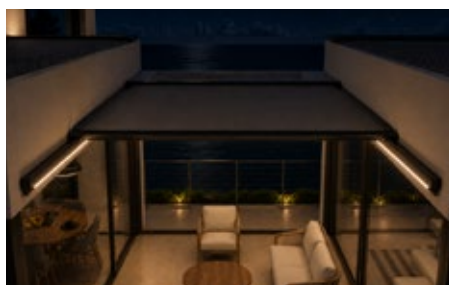

PERSONALISATION

Wide range of colours, fabrics and lighting options to create a unique space.

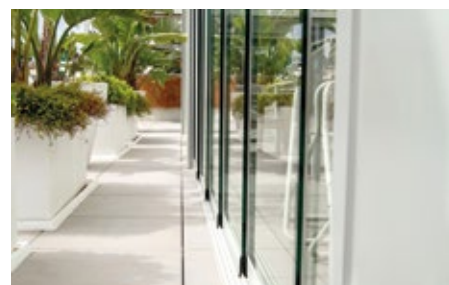

LIGHTING

Available in warm or neutral light

- Integrated into the intermediate profile
- Integrated into the reinforced guides

ACCESSORIES

- Side enclosures with hinged or sliding glass panels.
- Klais 110 vertical screens in technical fabric, providing protection from sun and wind while ensuring greater privacy.
