

Dress your pergola.

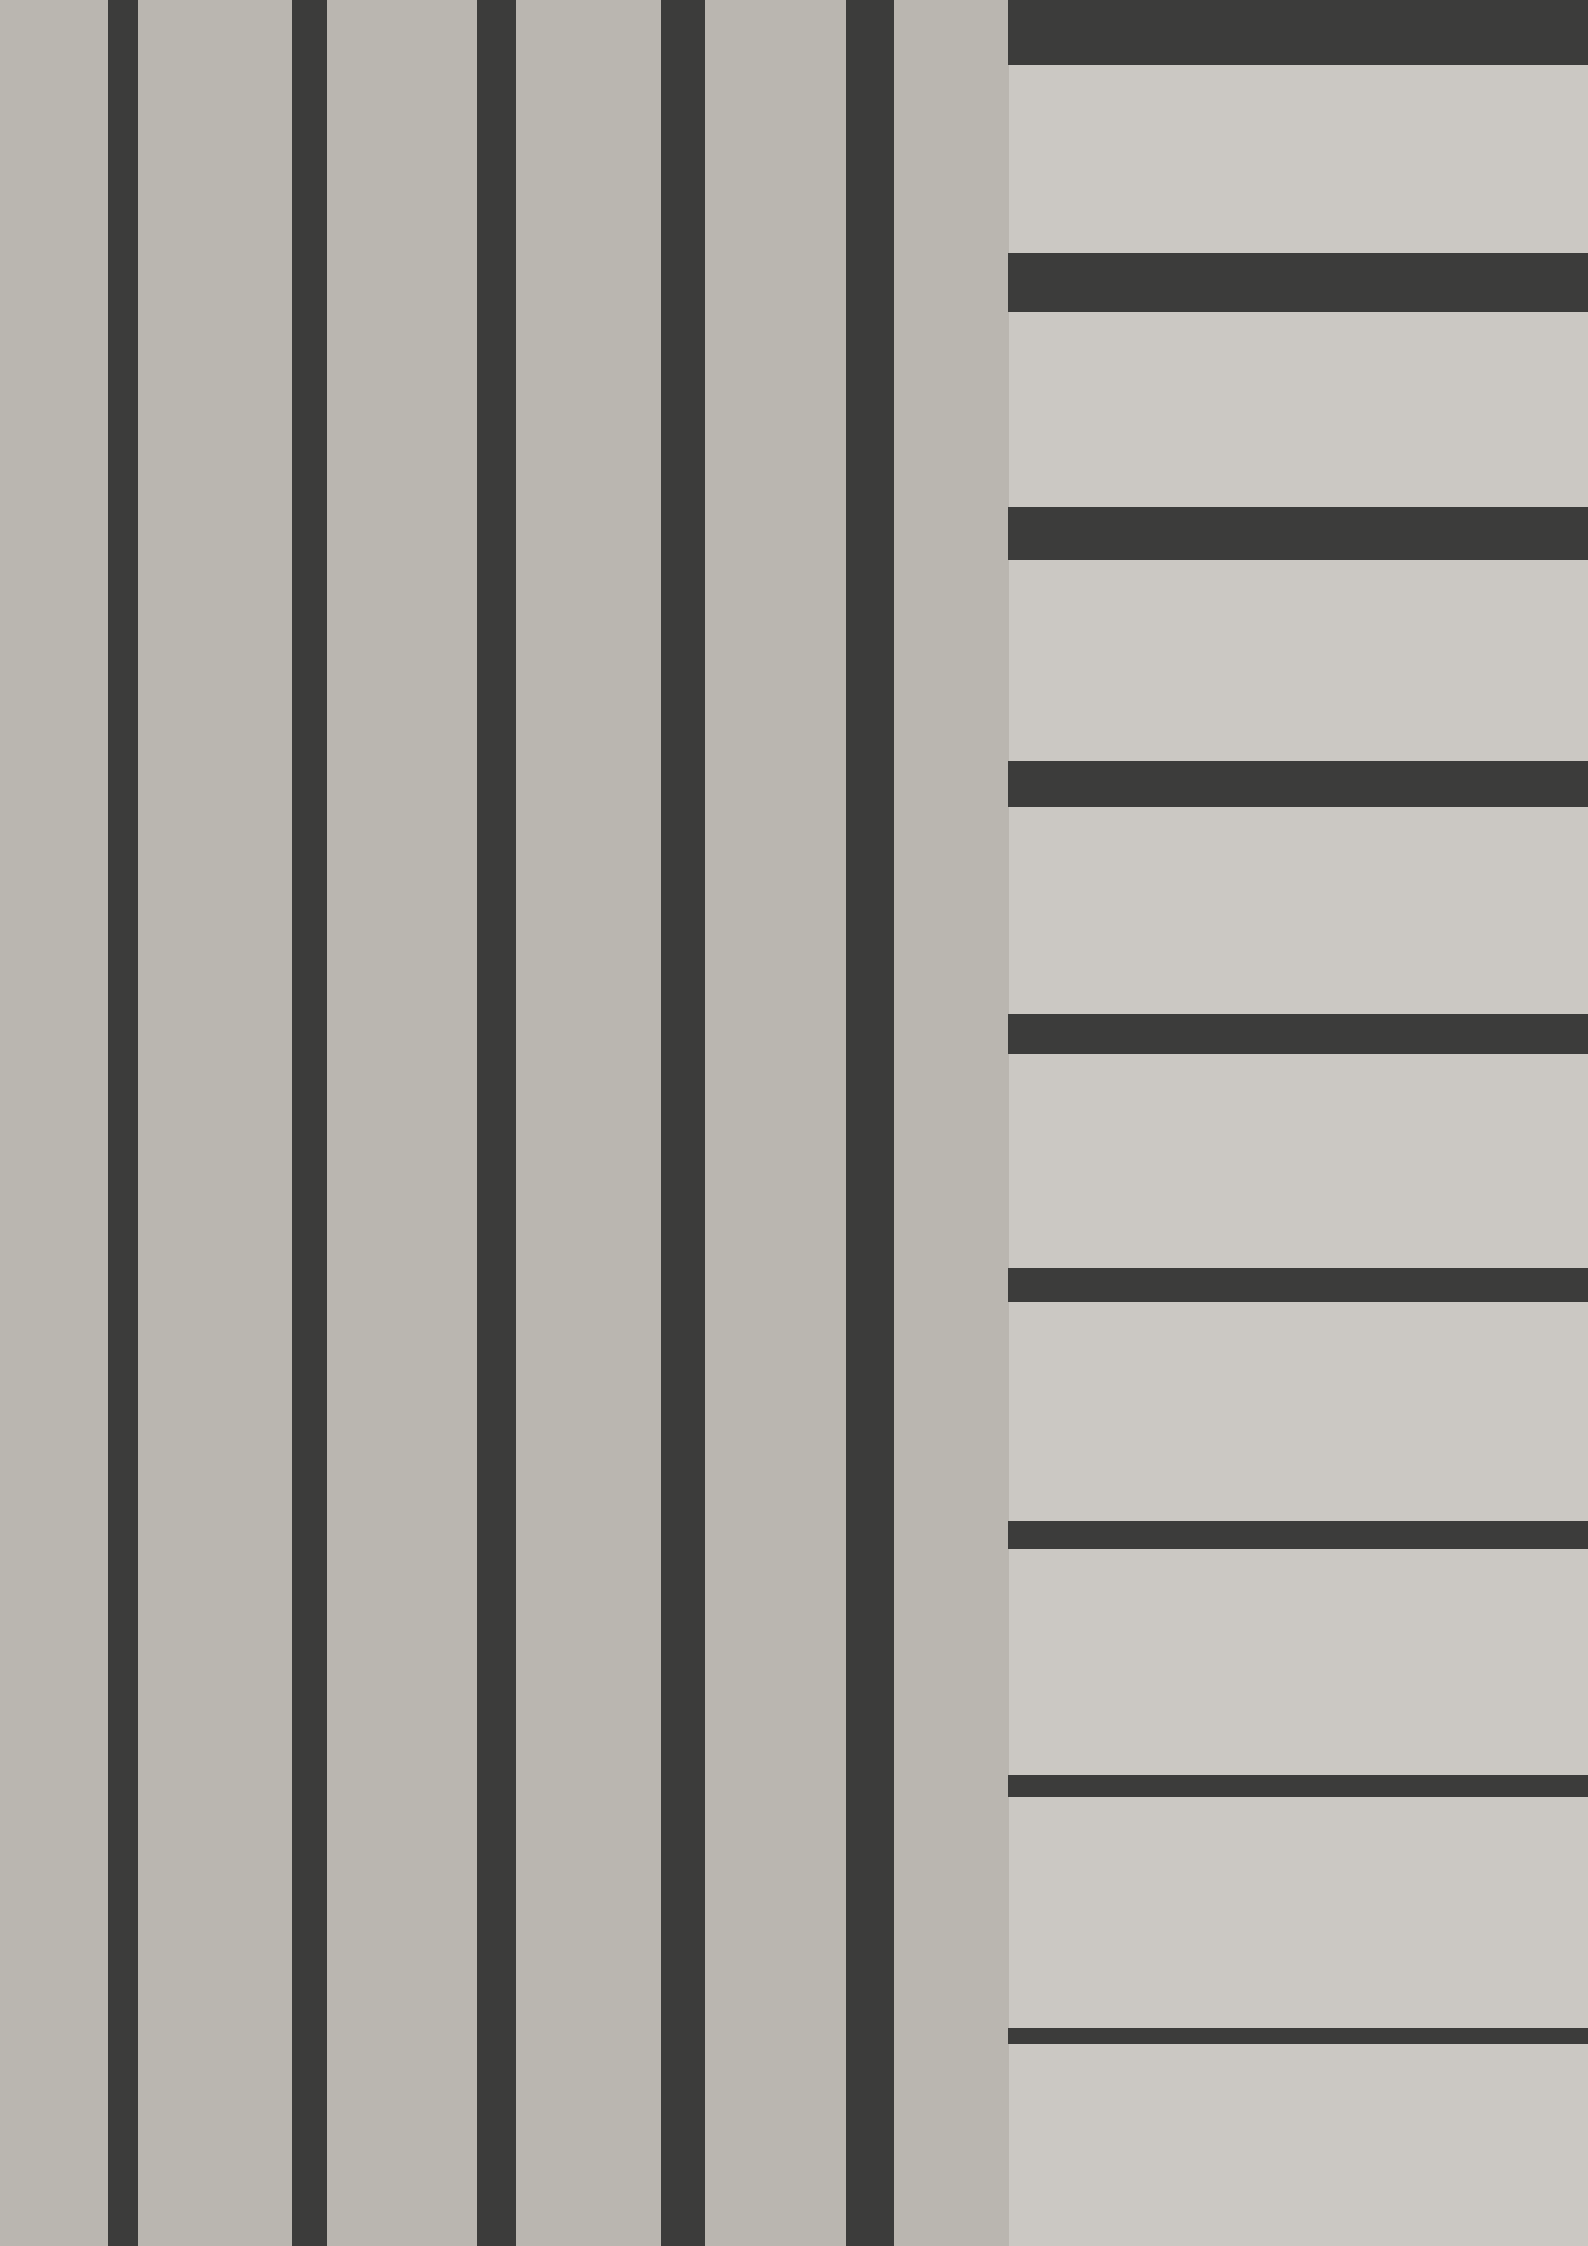

Turn your outdoor space
into a place to live.

Enclosures

for outdoor spaces

umara[®] by Llaza

More possibilities outdoors.

More privacy to enjoy.

Protection without losing the sense of openness.

Spaces that adapt to every moment.

For outdoor living, all year round.

Pergolas create spaces full of possibilities. Enclosures make them more comfortable, more private and ready to be enjoyed for longer.

The outdoors becomes part of your living space

Once you create this new living space, you begin to imagine all the ways you can enjoy it. Sometimes you want protection from the sun or wind; at others, you simply want to take in the view, always with the comfort and privacy you need.

UMARA brings together a range of solutions designed to adapt each space to the way you want to experience it. Vertical fabric screens that filter the light, glass enclosures that open up the space to the view, and decorative panels that give each space a character of its own.

FILTER

Klais 110 & Klais 130: Vertical screens for outdoor spaces.

Being in control of your surroundings is another way to enjoy them.

Klais vertical screens regulate the amount of light entering the space, reduce the impact of wind and provide privacy whenever you need it.

A versatile solution that enhances comfort and opens up new possibilities for your outdoor space.

The freedom to enjoy the outdoors shouldn't depend on the intensity of the sun, the wind or the need for privacy.

CONNECT

Nuna: Sliding glass enclosure.

Protection doesn't mean losing your connection with the outdoors.

Sliding glass panels preserve views and natural light, creating more comfortable, liveable spaces without losing that sense of openness.

Taking in the view is part of the experience, whether at home or on a restaurant terrace.

A transparent solution that keeps the landscape in view at all times.

OPEN

Wara: Stacking glass enclosure.

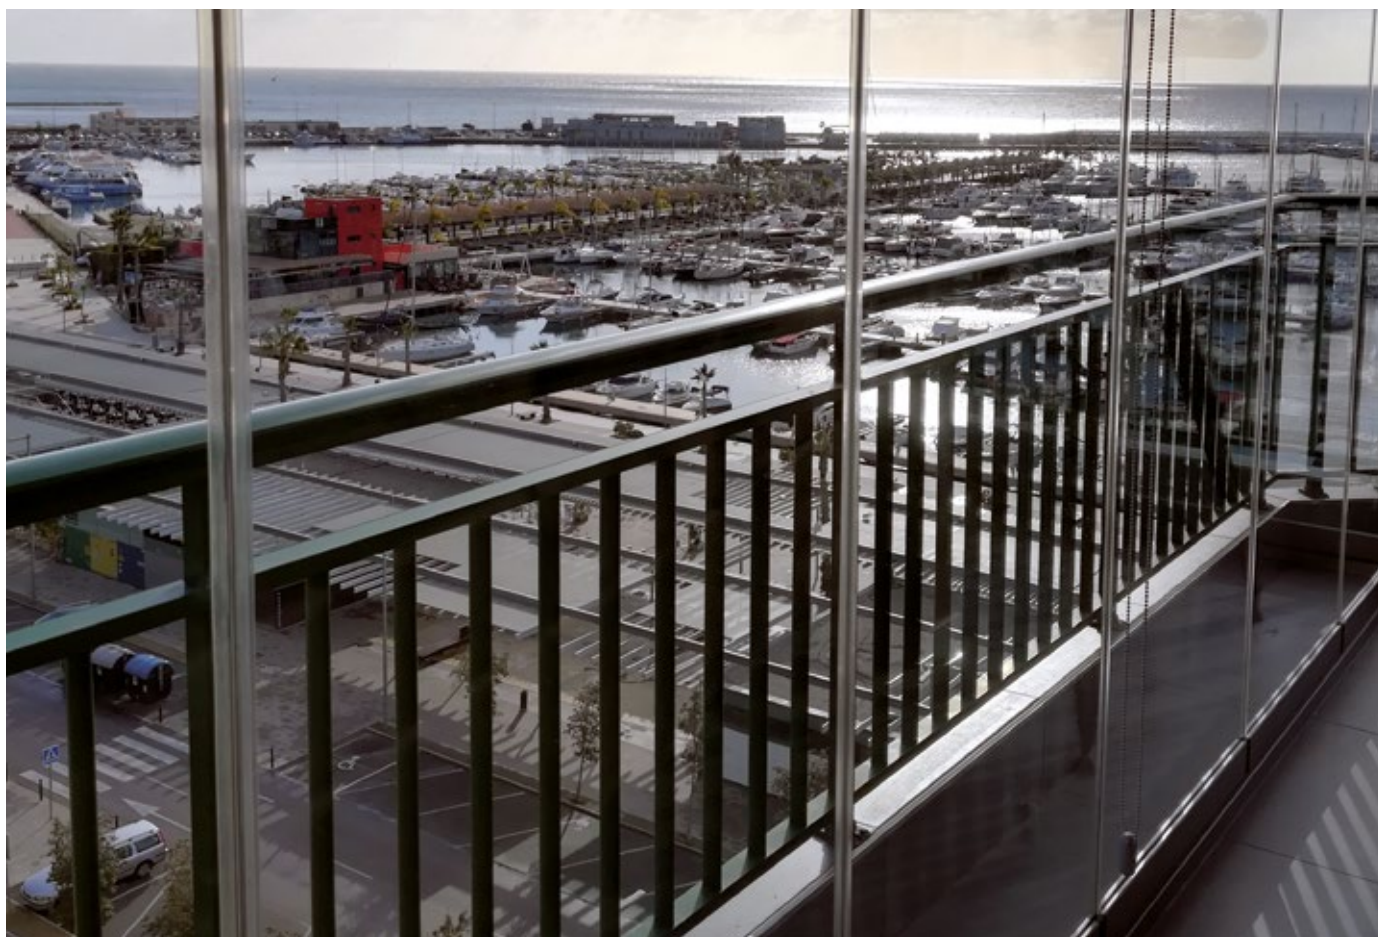

Sometimes you want to feel sheltered; at others, you want to open the space completely to the outdoors.

The glass panels fold away smoothly and effortlessly, allowing the space to open up completely whenever you choose.

Protection and freedom in a single solution, adapting your space to the way you want to experience it.

Some sensations can only be felt when the space is free to breathe.

DEFINE

Decopanel: Decorative screening that defines your space.

Decorative panels bring character, privacy and control over light, integrating seamlessly into the architecture to give each space an identity of its own.

A distinctive solution that protects and enhances the space.

A new way to experience outdoor living while expressing the unique character of each space.

More comfort.
More privacy.
More possibilities.

Solutions that transform pergolas
and outdoor structures into spaces
designed for living.

Klais 110 & Klais 130

Side enclosure system for pergolas designed to extend the possibilities of outdoor spaces, creating more protected, comfortable and versatile environments to enjoy throughout the year.

Its clean, minimalist design and aluminium structure integrate seamlessly into any architectural project, providing protection from wind, rain and direct sunlight without compromising the overall aesthetic.

Compatible with a wide range of configurations and finishes, Klais transforms terraces, gardens and hospitality spaces into places designed to be enjoyed at any time.

CASSETTE

Protects the fabric when retracted

MOTORISATION

Concealed inside the cassette profile

GUIDING SYSTEM

Available with ZIP guides, cable, rod or wide guides

Made in Europe

Manufactured, machined and assembled in Spain.

Powder coating

Powder-coated using an environmentally responsible finishing process.

MATERIALS

High-strength aluminium

Aluminium structure engineered for strength and durability.

Technical or acrylic fabric

Available in different fabric types to provide varying levels of protection and transparency.

OPERATION

Manual or motorised operation. Depending on the configuration selected, the system can include a remote control, weather sensors or smartphone control.

PERSONALISATION

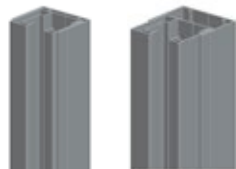

Wide range of colours and fabrics to create a unique space.

INSTALLATION VERSATILITY

ZIP guide

Its compact 35 × 45 mm dimensions minimise light loss while providing enhanced protection.

Compensating ZIP guide

Maintains perfect alignment even where there are minor irregularities in the wall, ensuring smooth, efficient movement without snagging or jamming.

Stainless steel cable or rod

Guiding system without side profiles, leaving the fabric edges exposed and maintaining a stronger connection with the outdoors. End fittings can be front-mounted or floor-mounted.

120 mm wide guide

Keeps the fabric securely positioned within the guide for maximum protection from sun, wind and rain.

MAXIMUM DIMENSIONS (m)

Klais 130		Klais 110	
Width	Drop	Width	Drop
6,50	2,50	5,00	2,50
5,50	3,50	4,50	3,50
5,00	4,50	4,00	4,00
4,00	6,00	3,50	5,00

Minimum width: 0.80 m

INSTALLATION

Suitable for installation on windows, glazed walls, balconies and vertical enclosures, both outdoors and indoors.

ACCESSORIES

Klais 130 and Klais 110 are the ideal complement to pergolas, porches and retractable flat awnings

Nuna

Sliding glass enclosure for terraces, porches and hospitality spaces, providing protection from wind, rain and noise without compromising natural light or views.

Its sliding glass panels allow the space to be opened or enclosed smoothly, creating comfortable environments with a clean, contemporary aesthetic.

The combination of aluminium profiles and safety glass brings elegance and functionality together, integrating seamlessly into any architectural project.

NO INTERMEDIATE PROFILES

For uninterrupted views

SLIDING GLASS PANELS

Glide along multiple tracks

WEATHER SEALING

Between glass panels

RECESSED OR SURFACE MOUNTED TRACKS

Wara

Stacking glass enclosure for terraces, porches and hospitality spaces, protecting the space from the elements while allowing it to be fully opened whenever desired.

Its glass panels fold and stack neatly to the side, providing maximum connection between indoor and outdoor spaces.

Combining safety glass and aluminium profiles, its design brings transparency, comfort and elegance together to create versatile spaces that can be enjoyed all year round.

CALIBRATED ROLLERS

Extend the service life of the system

MULTI-POINT RETENTION SYSTEM

Prevents the glass panels from dropping

STACKING GLASS PANELS

With smooth movement

DOUBLE BRUSH SEALS

Help prevent dust, wind and water from entering

Made in Europe

Manufactured, machined and assembled in Spain.

Powder coating

Powder-coated using an environmentally responsible finishing process.

MATERIALS

10 mm thermally toughened soda-lime silicate safety glass.

Aluminium and stainless steel profiles and accessories.

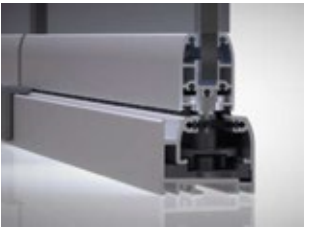

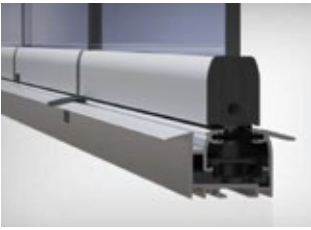

Rollers ensure smooth, quiet operation.

OPERATION

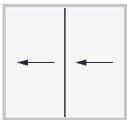

Manual operation with smooth, effortless panel movement.

INSTALLATION VERSATILITY

Surface-mounted or recessed bottom tracks to provide a clear, unobstructed passage.

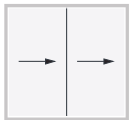

Concealed drainage system integrated into the tracks.

exterior

exterior

exterior

Can be configured to close from one or both sides, meeting in the centre.

MAXIMUM DIMENSIONS (m)

Wara		Nuna		
Width	Height	Single opening	Double opening	Height
7,00	3,00	7,80	15,60	3,00
Tempered glass thickness: 10 mm Maximum panel width: 800 mm		Tempered glass thickness: 10 mm Minimum panel width: 400 mm		

PERSONALISATION

Wide range of colours and finishes to create a unique space.

INSTALLATION

Can be installed on the Elya bioclimatic pergola, Atika tensioned pergola, Tupak roof and Elit 110 retractable flat awning.

ACCESSORIES

Nuna and Wara are the ideal complement to pergolas, porches and retractable flat awnings.

Decopanel

Protection and decorative screening system designed as a fixed or sliding architectural layer.

Its panels can incorporate a wide range of materials and patterns, allowing precise control over light and ventilation.

Beyond its decorative role, Decopanel is a flexible, effective solution that integrates seamlessly into the architecture, adding character while delivering the performance each project requires.

Made in Europe

Manufactured, machined and assembled in Spain.

Powder coating

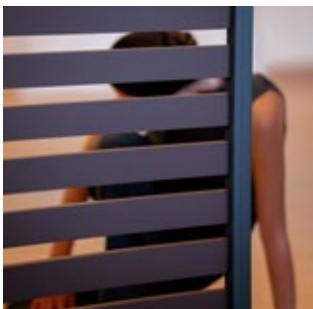

Powder-coated using an environmentally responsible finishing process.

MATERIALS

High-quality aluminium for frames, slats and decorative infill patterns.

OPERATION

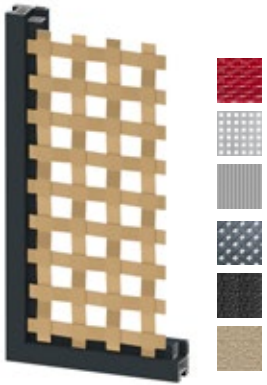

Manual operation with smooth sliding movement.

FINISHES

Fixed horizontal slats

Decorative pattern

Fixed vertical slats

Operable louvres

MAXIMUM DIMENSIONS (m)

Fixed louvres		Operable louvres
